SUMMARY

Software Engineer with 15+ years of experience in software development, system analysis, and solution design, with a strong focus on backend systems and complex operational applications. Experienced in designing and implementing railway control, train management, simulation, and information systems, while working directly with clients and stakeholders to translate operational requirements into effective technical solutions. Strong background in system architecture, modular systems, and end-to-end software development, with hands-on experience across backend, databases, distributed systems, and application architecture.

EXPERIENCE

HMI Engineering - PT. Len Railway Systems, Bandung Jan 2017 - Present

- Served as System Analyst for SIJAGUNG, an information system for monitoring corn production in Indonesia, collaborating directly with Polri stakeholders to analyze business processes, elicit requirements, translate operational needs into system specifications, and propose solutions aligned with business objectives.
- Served as System Analyst and Backend Programmer for PROKA, working directly with DJKA stakeholders to analyze operational workflows, define system requirements, design solutions, and implement backend functionality aligned with operational needs.
- Developed a Man-Machine Interface (MMI) training application using COPA-DATA zenon for the Urban LRTJ Train Simulator at PPI Madiun, enabling simulation of real-time train control and operational scenarios. The solution was showcased at Asia Pacific Rail 2026 in Bangkok, Thailand.
- Developed a Train Management Information System that enables operators to plan, record, and visualize actual train movements in the Train Trip Graph, supporting operational planning and monitoring across Surabaya Centralized Train Control, Purwokerto Centralized Train Control, Madiun Centralized Train Supervisory, and Soekarno-Hatta Airport Skytrain.
- Developed an Automatic Broadcast System that integrates the timetable system with Public Address (PA) and Passenger Information Display (PID) at Soekarno-Hatta Airport Skytrain.
- Developed an Online Man-Machine Interface (MMI) for real-time railway monitoring and control, showcased at RailwayTech 2023.
- Managed a team of HMI engineers and coordinated the integration of HMI systems within the Yogyakarta Operations Control Center.
- Designed HMI solutions spanning hardware architecture and software configuration for 50+ railway stations across Indonesia.
- Redesigned and standardized signaling HMI specifications to improve consistency across railway projects.

Software Developer - Boarding Labs, Bandung Sep 2014 - Dec 2016

- Led a development team to analyze requirements and deliver an Inventory Management System aligned with business and operational needs.
- Developed a photo booth desktop app using Mac and DSLR Camera for Pix.ly.
- Developed iOS mobile applications including Finpay, WeDrink, FiClip, PRIMA, HP Store.

Web & Mobile Developer - WAMR, Bandung Aug 2012 - Aug 2014

- Developed iOS mobile applications including Popbot, Guardian, Knowledge.
- Developed portfolio websites including Gelaelized and Acer DJ Tiesto.
- Redesigned the Jomblo.com social media website.
- Developed the Flores interactive comic website.

Professional Placement Programmer - PT. Ciptadrasoft, Depok

2013

- Redesigned the company's corporate and Kemkominfo portal websites.
- Developed chat, Google Alerts, and report generation features for Onebox CRM.

iOS Developer - PT. Arya Jaya Formasi, Bandung

Aug 2011 - Jul 2012

- Developed the iPosting iOS social media application.
- Developed iPad games for Rehydration Games (Pocari Sweat).

ARCHITECTURE & DEVELOPMENT SKILLS

- Software Architecture: Modular Monolith, Microservices, DDD
- System Design: High-Level Design (HLD), Low-Level Design (LLD)
- Distributed Systems: Event-Driven Architecture
- Architectural Patterns: Onion Architecture, Hexagonal Architecture, CQRS
- Backend & Integration: API Gateway, Authentication & Authorization

TECHNOLOGY STACK & TOOLS

- Backend: TypeScript, Node.js, Java, Spring Boot, PHP, Laravel
- Database: PostgreSQL, MySQL
- ORM & Data Access: Prisma
- Caching & In-Memory Data: Redis
- Messaging & Streaming: Apache Kafka, ZooKeeper
- Containerization & Orchestration: Docker, Kubernetes
- Cloud: Google Cloud Platform (GCP)
- Frontend: Next.js, PixiJS
- Desktop: Java Swing
- Mobile: Swift, Objective-C
- Testing: JUnit, Mockito

EDUCATION

Purwadhika Digital Technology School

Oct 2024 - Feb 2025

Digital Talent Incubator (DTI) — Senior Software Engineer Program
Fully Funded Scholarship
Score: 86.2 / 100
Final Project: Developed a microservices-based multi-warehouse e-commerce application using Domain-Driven Design (DDD).

Bandung Institute of Technology

Aug 2021 - Apr 2022

Engineers Profession Program
Fully Funded by PT. LRS
GPA: 3.75 / 4.00

Bandung State Polytechnic

Aug 2010 - Aug 2014

D-IV Informatics Engineering
3 Years PPA Scholarships (Improving Academic Achievement)
GPA: 3.73 / 4.00
Final Project: Wheeled Robot Simulation to Follow The Wall with Wall Follower Algorithm
